# Ensuring the energy performance of your installations, wherever it is critical

When **energy** matters

SYD/01/514

**For more than a centenary, Socomec, a family-owned industrial group, has been designing, manufacturing and selling electrical equipments: inverters, measuring stations, energy storage, switches, automatic source switches...**

**With a strong expertise in critical power applications, Socomec is an innovative player in energy transition and renewable energy.**

Throughout its history, Socomec has constantly anticipated market changes by developing cutting-edge technologies, providing solutions that are adapted to customer requirements and fully in keeping with international standards.

Expert in electrical networks and installations performance, Socomec improve the energy efficiency of electrical installations wherever it is critical: industry, infrastructure, healthcare, data center, energy and C&I buildings.

With 12 production sites, 30 subsidiaries, products and services distributed in 80 countries by more than 100 distributors, Socomec accompanies you for a more secure, flexible and efficient energy.

**100 years**  
OF SHARED ENERGY

**1**  
**independent**  
**manufacturer**

**3,500 m<sup>2</sup>**  
**of test platforms**

One of the leading independent power testing labs in Europe

**8 %**  
**of turnover invested in R&D**

Always at the cutting-edge of technology for innovative, high quality products

**110,000**  
**on-site interventions per year**

Nearly 400 experts in commissioning, technical audit, consultancy and maintenance

# Your energy, our expertise

## Power switching

### Managing power and protecting people, equipment and installations

Active in the industrial switching market since its foundation in 1922, Socomec is today an undisputed leader in the field of low voltage switchgear, providing expert solutions that ensure:

- isolation and on load breaking for the most demanding switching applications,
- continuity of the power supply to electrical facilities via manual remotely operated or automatic transfer switching equipment,
- protection of persons and assets via fusebased and other specialist solutions.

## Power monitoring

### Improving energy performance and monitoring installations

Socomec solutions - from current sensors to power meters and from IOT to energy management software - are driven by experts in energy performance. They meet the requirements of facility managers and operators of commercial, industrial and critical buildings to enable and facilitate:

- the measurement of energy consumption, the identification of sources of excess consumption and the generation of awareness amongst occupants as to their impact,
- the utilisation of the best available tariffs, utility bill checks and the accurate distribution of energy billing between consumer entities,
- the limitation of reactive energy and avoidance of associated tariff penalties,
- capacity management and the evolution of the electrical installation,
- improvements to power availability by monitoring and detecting insulation faults.

POWER  
CONVERSION

# Power conversion

## Ensuring the availability and storage of high quality power

With its wide range of continuously evolving products, solutions and services, Socomec are recognised experts in the cutting-edge technologies used for ensuring the highest availability of the electrical power supply to critical facilities and buildings, including:

- static uninterruptible power supplies (UPS) for high-quality power free of distortions and interruptions occurring on the primary power supply,
- changeover of static, high availability sources for transferring the supply to an operational back-up source,
- permanent monitoring of the electrical facilities to prevent failures and reduce operating losses,
- energy storage for ensuring the proper energy mix of buildings and for stabilisation of the power grid.

# Expert services

## Enabling available, safe and efficient energy

Socomec is committed to delivering a wide range of value-added services to ensure the reliability and optimisation of end-users' equipment:

- prevention and service operations to lower the risks and enhance the efficiency of operations, for high-quality power free of distortions and interruptions occurring on the primary power supply,
- measurement and analysis of a wide range of electrical parameters leading to recommendations for improving the site's power quality,
- optimisation of the total cost of ownership and support for a safe transition when migrating from an old to a new generation of equipment,
- consultancy, deployment and training from the project engineering stage through to final procurement,
- performance assessment of the electrical installation throughout the life cycle of the products via analysis of data transmitted by connected devices.

✓  
EXPERT  
SERVICES

SITE 1059

# Your partner in expert services

Socomec is committed to delivering a wide range of value-added services to ensure the reliability and optimisation of end-users' equipment during its life cycle

- Prevention and service operations to reduce risk and enhance equipment efficiency.
- Measurement and analysis of a wide range of electrical parameters leading to recommendations for power quality improvement.
- Consultancy, deployment and training from the project engineering stage to the final procurement stage.

## Specialists - at your service

Our Services team comprises qualified engineers whose mission is to ensure the correct operation of your equipment. We offer a comprehensive support service package which gives you complete peace of mind: commissioning, on-site testing, preventive maintenance visits, 24-hour call out and rapid on-site repairs, original spare parts, power quality and energy efficiency audits, consultancy, design and implementation of installation modifications and updates.

Our Services team is the most reliable partner when it comes to advising you on the maintenance of Socomec equipment and providing resolution to any problems in accordance with current environmental standards and procedures.

## Professional tools

Our Services team is provided with the latest essential equipment including:

- Personal Protective Equipment (protective goggles, helmet, insulated gloves, fireproof jacket, safety shoes, earplugs...),
- laptop embedded with all software required to optimise equipment performance,
- measuring equipment calibrated annually by our metrology department (multimeter, digital scope, current clamps, infra-red camera, power analyser).

## Reports

An exhaustive report is generated for each intervention (including commissioning, preventive maintenance and troubleshooting) which is then automatically sent to the customer and synchronised with our systems.

## Remote diagnostics

In case of any anomaly, an automatic notification is sent to a local call centre for proactive online troubleshooting.

## Availability of original spare parts

The various original parts and components that we stock guarantee that any faulty equipment can be rapidly brought back online, whilst maintaining its original performance and reliability.

## Key figures

Nearly 400 Socomec experts - supported by 200 engineers and technicians from across our distributor network - can provide the solutions to your specific needs.

# Project consultancy

short-term UPS rental

SITE 789 A

For guaranteed high quality, uninterrupted electrical energy - where and when you need it most - Socomec UPS Rental is the ideal short-term critical power solution for rapid response deployment.

**Immediate UPS availability:** over 200 standard UPS across all power ranges (from 1 to 500kVA) are in-stock, ready to be fast-tracked to your site.

**Flexible rental options:** because every situation is unique, Socomec offers a flexible approach to rental periods, from just one week up to several months and beyond – with easy extension options.

**All-inclusive solution:** as the industry experts, Socomec will take care of all aspects of the UPS shipping, commissioning and maintenance – right through to removal and return transportation - making deployment quick and easy.

## Key points

- > UPS shipped in 4 hours
- > Dedicated transport to customer site
- > UPS commissioning
- > Hot-line technical support
- > Next working day repair service
- > UPS decommissioning and removal
- > Return transport

## Benefits

- > First choice: rapid identification of the optimum solution for your unique requirements
- > Fast delivery with express shipment
- > Flexible: rental periods available upwards of just 1 week, with easy extension options
- > Safe: manufacturer standards guarantee compliance and technical performance
- > Cost effective: rental fees are tax deductible as operating expenses\*

\* According to local tax legislation.

# Commissioning

for single-phase and three-phase Uninterruptible Power Supply (UPS)

APPL11079-EP5

The commissioning of a UPS covers start-up of the equipment, verification of its functions according to its design specifications, and to ensure that it is compatible with the customer's working environment.

Socomec performs the commissioning service within a quality process standard by ensuring that your equipment will be delivered in a safe, reliable and operational condition.

COMMISSIONING DATE (UPS)	_____
COMMISSIONING DATE (Battery)	_____
VALIDITY OF THE CERTIFICATE (check renewal)	_____

**SOCOMECC** (www.socomec.com) declares the system has been checked and certified for high quality and availability supply and reserves the right to limit the responsibility in case the start up and the maintenance is not performed by authorised personnel.  
 The present certificate should be renewed on yearly basis.

\* Personnel is authorised only if trained by the manufacturer and enabled by a certificate released by the manufacturer. Only authorised personnel can insure Competence, Original spare parts, global diagnostic through appropriate tools, Update of the unit according to new releases.

## Key points

- > Work environment inspection
- > Electrical installation check (isolator switch, cabling, circuit breakers etc.)
- > UPS internal and external check
- > System power on and set up
- > Operating test on single UPS and/or parallel system
- > Load bank test (on request)

## Benefits

- > Compliance with the various installation standards
- > Completes the Factory Acceptance Test
- > Commissioning traceability
- > Conformity certificate

# Remote commissioning

for MASTERYS UPS from 10 to 40 kVA

SYDNEY\_951\_A/PSD

The remote commissioning is a service dedicated to installers and system integrators and guarantees that UPS starts up on time.

From now on, this service allow you to benefit an easier scheduling, an operational efficiency and a better time optimisation for you and your customers.

Using an exclusive technology, remote commissioning allows expert Socomec engineers to remotely access your UPS and perform all commissioning tasks with the same level of quality, security and reliability as if they were with you in person.

#### Maximum speed and flexibility

- Quick commissioning using your mobile phone.
- Eliminate red-tape and bureaucracy.
- No more site access restrictions.
- Intervention scheduling becomes easier to manage.

#### Access to the best experts

- Remote connection to the product by certified Socomec experts.
- Simple and fully-assisted procedure.

#### Secure and reliable commissioning

- Highest standard protocols.
- UPS remote access via OTP code.
- On-demand encrypted connection.
- Cyber security audit by certified independent organization.

#### Reduced costs and carbon impact

- Time saving.
- More cost-effective and eco-friendly than on-site intervention.

#### Keys points

- > Quick, remote commissioning – anywhere, at any time
- > Same level of services than on-site commissioning
- > Support from certified Socomec specialists
- > Cost efficiency and lower carbon impact

# Commissioning

## for STATYS Static Transfer System (STS)

APPLI 1048-EP5

The commissioning of an STS covers start-up of the equipment, verification of its functions according to its design specifications, and to ensure that it is compatible with the customer's working environment.

SOCOMEc performs the commissioning service within a quality process standard by ensuring that your equipment will be delivered in a safe, reliable and operational condition.

### Key points

- > Work environment inspection
- > Electrical installation check
- > STS internal and external check
- > System power on and set up
- > Ventilation check
- > Operating test

### Benefits

- > Commissioning performed in compliance with applicable quality and safety standards
- > Compatibility with your work environment
- > Compliance with the various installation standards
- > Conformity certificate

# Maintenance contracts

for single and three-phase UPS

APPL 1064-EP5

The Maintenance service contracts are entirely tailored around customers' needs, taking into account individual operating constraints, business activity and the unique level of criticality associated with specific applications.

A variety of contracts suitable for users have been developed to cover all needs: from a simple combined service, to a fully-inclusive package that includes the cost of labour and spare parts and delivers the quickest response time to site.

<sup>(2)</sup> For MODULYS GP only.

## Key points

- > Original spare parts
- > Expert engineers equipped with professional tools and software
- > Safety procedures

## Benefits

- > Improves system availability
- > Optimises product lifespan
- > Guaranteed response time to site

## Evolution pack summary for MODULYS GP

Evolution Pack delivers the most comprehensive service guarantee for MODULYS GP:

- > 5-year, fully inclusive package,
- > Permanent access to the latest technology,
- > Regular upgrades with complete module replacement,
- > Futureproof your system: eliminate end-of-life criticality

# Maintenance contracts

for STATYS Static Transfer System (STS)

APPL1066-EP5

Silver, Gold, Platinum and Platinum+ are the Maintenance service contracts suitable for standard STS.

50+ years of manufacturer's experience is at your disposal to provide you with a comprehensive support package which affords you complete peace of mind.

SERVICE DESCRIPTION	SILVER	GOLD	PLATINUM	PLATINUM+

- > Optimises product lifespan
- > On-site interventions guaranteed

# Optional services for maintenance contract

preventive maintenance visit

APPLI 724 A

The service life of equipment depends on the operating environment (temperature, humidity, dust).

To keep equipment running at maximum levels of efficiency and to avoid system downtime with possible risks and damage to loads, it is important to have the manufacturer's expertise to perform regular preventive maintenance.

This is the best way to ensure the reliability of your equipment over time and the most cost-effective solution to keep the Total Cost of Ownership under control.

## Key points

- > Inspections: mechanical, electrical, battery
- > Dust removal / equipment cleaning
- > Software updates
- > Electronics testing
- > Environmental checks
- > Battery check\*
- > Communication test
- > Maintenance report

*\*Only for UPS.*

## Benefits

- > Helps reduce equipment malfunction
- > Optimises operating efficiency
- > Extends equipment lifetime
- > Improves system availability

# Optional services for maintenance contract

emergency service 24/7

SITE 588/A

The response time to site is vital for business continuity; limiting as much as possible any downtime, in order to avoid any risk of severe system anomaly.

It is, therefore, essential to have the expertise of a maintenance service provider who fully understands your equipment, knows your working environment and who can respond to emergencies within a time guaranteed by a bespoke Service Level Agreement (SLA).

Proximity and emergency service carried out by the manufacturer are the best guarantees for fast troubleshooting and real problem solving.

## Key points

- > Specialist team of engineers on call 24/7
- > Technical expertise on-site within 4 hours\* guaranteed
- > Remote monitoring and proactive troubleshooting with SoLink
- > 24/7 original spare part stock availability with high priority shipment

*\* Please check the service coverage in your area.*

## Benefits

- > High quality technical support
- > Fast and precise diagnostic
- > Real problem solving

# Optional services for maintenance contract

**SoLink** - Socomec experts 24/7 UPS remote monitoring

STONL605\_A\_GB/UPS

SoLink is one of the services included in a Socomec Maintenance Contract. When the application is critical, you can be assured of immediate and expert attention via SoLink. SoLink will automatically identify the anomaly and notify the nearest Socomec Service Centre when the UPS' operating parameters fall outside the permitted range - providing you with a permanent and direct connection to Socomec's expert technical team.

## Restore your systems in record time

**Proactive alarm check:** When your UPS alarm is activated, SoLink will instantly notify the nearest Socomec Service Centre. The supervisor technician will carry out an initial check-up by accessing the UPS dashboard on the Cloud platform.

**Remote troubleshooting:** In the event that more in-depth analysis is required, a Socomec expert engineer will connect to your UPS through remote access in order to run tests and diagnostic tasks directly on your machine, in complete security.

**First-time-fix intervention:** In the event that on-site intervention is required a Socomec on-call engineer will be dispatched immediately with a full brief from the Socomec Service Centre, along with any spare parts that may be needed.

## Improve future performance

**Periodic reporting:** Socomec experts will provide you a periodic UPS health-check report with event statistics, trend analysis and technical recommendations to improve overall system availability.

**Interactive web dashboard:** The IoT cloud-connectivity allows you access to an intuitive, interactive dashboard that gives a view of the equipment's historical data and performance trends.

**SoLive App:** Remote UPS monitoring from a smartphone – anytime, anywhere. With real-time alarm notifications and detailed status updates for each UPS, it's now possible to manage unexpected events and develop a real insight into the operating environment.

### Key points

- > **Effective:** if an anomaly occurs, MTTR is drastically reduced
- > **Secure:** data is hosted on Socomec-owned cloud infrastructure, Cyber security is certified by a third-party company
- > **Affordable:** proposed as an optional extra on the Maintenance Contract at an attractive price

### Benefits

- > Prevents problems from occurring
- > Increases system availability
- > Saves downtime costs

# Optional services for maintenance contract

**SoLink** - Socomec experts 24/7 UPS remote monitoring

## Provide a unique user experience

### Remote trouble shooting

Initiate problem solving in complete security

The Socomec technician is available upon request - and in collaboration with the end-user - to remotely access the UPS. This means that diagnostic tasks can be conducted in a more precise way and problem solving interventions can be initiated, as if in front of the machine.

Direct expert access to your UPS.  
Root cause analysis – with no downtime.  
Issue detection in real-time.  
Remote tasks can be run within cyber security protocols.

SITE 923

### Interactive web dashboard

Historical UPS data is just a click away

Verifying your UPS performance is now an innovative digital experience with the new SoLink interactive web dashboard.

SOFT 152

Visualise the data history for the main operating parameters.  
Select your period (hour / day / week / month / year).  
Choose the sampling frequency of the measurement.  
Zoom in on the graph to see the detail.

### SoLive UPS

Live UPS data always in hand

While SoLink is supported by experts ready to intervene on your behalf, you can access information about the status of your UPS directly from your smartphone with SoLive UPS!

Data provided:  
current UPS status,  
battery level,  
battery back-up time (minutes),  
UPS operating temperature.

SOFT 132

Download SoLive UPS app:

# Optional services for maintenance contract

remote troubleshooting problem solving securely and instantly

ST01L\_095

As soon as a problem occurs, Socomec's expert engineers are available upon request - and in collaboration with the end-user - to conduct diagnostics and root cause analysis, restoring the system in record time. The engineer connects to the UPS through remote access in order to run tests and diagnostic tasks directly on the machine - in complete security.

Problem solving interventions can be carried out with the same efficiency as if in front of the equipment.

#### Fast intervention

- Easy scheduling activity.
- Direct remote access to the UPS in order to solve issues at distance.

#### Access to the best experts

- Equipment looked after remotely by experienced Socomec specialists.
- Experts will meet precise requirements and standards as per on-site visits.

#### Real-time issue analysis

- Remote diagnostics and tests are as effective as if in front of the UPS.
- Fast root cause analysis.

#### Reduced costs and carbon impact

- Time saving.
- More cost-effective and eco-friendly than on-site intervention.

Contact us to find out which UPS ranges and models are compatible with this service.

#### Key points

- > Direct access to UPS
- > Immediate response time
- > Same level of service as with on-site intervention
- > Issue analysis in real time
- > On-demand encrypted connection
- > Cyber security audit by certified independent organisation
- > Available under maintenance contract

# Optional services for maintenance contract

consumables replacement

APPLI, 10/05/17/PS

The components of each equipment are designed to operate reliably during the product's normal lifecycle, in the electrical environments and environmental conditions stated in the installation and operating manual.

To reduce the impact of ageing on your system, which could affect the efficiency and availability of the installation, it is vital to carry out the regular preventive replacement of parts subject to wear and tear such as fans and capacitors for UPS, and fans for STS, COSYS and MEDSYS products.

## Key points

- > Original spare parts

## Benefits

- > Prevents equipment instability and malfunctions
- > Avoids risk of system breakdown
- > Saves downtime costs

Fans and capacitors must be replaced by qualified personnel only. Only Socomec personnel are authorised to make recommendations for any replacement parts.

# Optional services for maintenance contract

power module as a spare for MODULYS XL modular UPS system

APPL\_1083\_EPS

The addition of the Power module as a spare option to the maintenance contract of MODULYS XL will always allow to maintain the level of availability of the installation.

A spare power module will be to hand next to the MODULYS XL so that the module can be swapped in case of failure in less than 5 minutes.

The module can also be used during the preventive maintenance visit - to be inserted instead of the maintained module and therefore ensure the same level of availability.

The price is "all inclusive" and comprises:

- a maintenance slot and a spare power module rental,
- training to enable the customer to change the module by himself and avoid any problems,
- the maintenance of the spare module (spare parts and consumables).

## Key points

- > Spare power module available 24/7 on customer site
- > Price all inclusive covering training in how to swap the module, module rental & its maintenance

## Benefits

- > "Ready to use" spare power module always available on customer site
- > Ensures the same level of secured availability during maintenance operations and in case of critical failure
- > No downtime during maintenance operations
- > Maintenance slot provided to test & repair the power module outside of the UPS system

APPL\_1082\_EPS

# Optional services for maintenance contract

power brick as a spare for DELPHYS XL UPS

1004

Take advantage of the "Power brick as a spare" option of your service contract and maximise the availability of your DELPHYS XL UPS.

Coupled with a maintenance station, you can have a spare power brick kept in working order at all times near your DELPHYS XL.

#### Maintaining availability

With its internal redundancy, should a power brick fail the DELPHYS XL UPS will continue to operate in double conversion mode provided that the operating load does not exceed 80% of the nominal load.

#### "All inclusive" option

We provide the spare brick and maintenance station, with a Socomec expert carrying out the maintenance (including brick spare parts and consumables).

#### Minimises MTTR

When we replace and repair the faulty brick, we need no more than 30 minutes to bypass the load as we replace the brick. We can schedule in the work to suit the terms of your service contract.

#### A solution that counts as an operating expense (OPEX)

With this option, you can keep on top of your finances without impacting your cashflow.

#### Key points

- > Reduced MTTR
- > Operational power brick kept at the customer's site
- > Manage a complete brick rather than spare parts
- > Use this option to cover the needs of multiple machines installed at the same site
- > Socomec accepts ownership and liability for the brick

# Optional services for maintenance contract

## Battery care<sup>(1)</sup>

918

Batteries are a key element of UPS systems. Their efficiency and availability are important for preventing load downtime, but at the same time batteries are the most vulnerable and failure-prone component of such systems.

Battery failures are mainly caused by the premature "end of life" of a few battery blocks. A corrupted battery block, if not detected early and not replaced, can accelerate ageing within the rest of the battery string, therefore jeopardizing the integrity of the system.

The level of predictability for failure detection on a battery block depends on the number of measurements, tests and analyses that are performed on every single block.

Main factors for the premature end-of-life of battery blocks:

- High temperatures
- Frequent number of cycles
- Discharge too deep
- Recharging with high voltage
- Lack of regular maintenance

Source: Eurobat

### Key points

- > Impedance test, thermal imaging, temperature, voltage measurement block by block
- > Faulty/weak block detection
- > Back-up time measurement (optional)

### Benefits

- > Information on the battery's state of health
- > Estimation of the optimum time for battery replacement
- > Optimisation of the battery's useful working life

(1) Only for UPS.

Battery Care is a brand new set of service packages that complements the standard battery check service (at string level) during the UPS preventive maintenance visit.

The packages will ensure the integrity of your business continuity by performing the highest level of inspection on your battery blocks.

### Features:

The Battery Care offering is designed around 3 packages: IMP (IMPedance), TEMP (TEMPerature) and PRIME (the full package).

ACTIONS	WHERE	BATTERY CHECK	BATTERY CARE		
			IMP	TEMP	PRIME
Visual inspection check for leakage and corrosion	string	•	•	•	•
Cleaning	string	•	•	•	•
Measurement with partial discharge of V & I	string	•	•	•	•
Environment temperature check	string	•	•	•	•
Control of floating voltage and max current*	string	•	•	•	•
Impedance test	each block		•	•	•
Temperature measurement	each block			•	•
Voltage measurement*	each block			•	•
Thermal imaging	each block				•
Torque setting	each block				•
Back-up time measurement**	string		○	○	○

•: inclusive.

○: optional.

\* during battery charge. \*\*: by performing the end of discharge voltage test.

Depending on the package chosen (IMP, TEMP, PRIME), a set of accurate measurements, tests and analyses will be performed on each single block across all battery strings by Socomec trained engineers.

An in-depth report will provide information about:

- the health of each single battery string/block,
- the faulty blocks that need to be replaced,
- the real "back-up time" of the battery system (optional).

### Do you know your real back-up time?

- > For various external factors, your real back-up time could be much less than the one declared by the battery manufacturer.
- > Thanks to a specific set of measurements and analyses, Socomec can provide you with the exact back-up time of your battery system.

# Optional services for maintenance contract

## Battery replacement<sup>(1)</sup>

APPLI 732 A

(1) Only for UPS.

The majority of batteries used in UPS applications (VRLA - Valve Regulated Lead Acid) normally have a calendar life of 5-10 years, depending on the local operating conditions. The calendar life is the actual time span from the date of installation until the end of life, when battery capacity drops below 80% of its rating. VRLA batteries that are well maintained and installed in a properly conditioned environment, typically have a service life of 70% to 80% of their calendar life. This explains why the UPS back-up time could differ from the one declared by the battery manufacturer.

For the integrity of business continuity, it is essential to know the estimated end-of life of the battery system and to be correctly advised concerning the best time for its replacement.

The expertise of the UPS manufacturer is the best guarantee for carrying out any battery replacement operations. An expert that understands your equipment and how it is integrated into your unique working environment and who can respond effectively to any anomaly should any occur.

### Key points

- > Checking and recalibration of battery charger setting
- > Fully secure battery discharge test
- > Battery disposal according to local regulations

### Benefits

- > Prevents unexpected early shutdown of the UPS
- > Saves downtime costs
- > Advice for the optimisation of the battery back-up time

SVC 008 A GB

The battery is a critical component of the UPS system: according to a study by the Ponemon Institute, 65 % of Uninterruptible Power Supply (UPS) system failures are due to batteries. The reliability and availability of these components are vital to ensuring the energy supply to the load.

In the case of a failure, the economic impact of an outage can dramatically increase to hundreds of thousands of euros for the UPS owner.

Within the UPS system, the battery represents the weakest and least sophisticated component, while its cost represents an important part of the investment. It is therefore crucial to reduce the number of maintenance operations, maximise the battery's return on investment and anticipate battery malfunctions.

This can be implemented by following the rules described in the IEEE standard 1188 (IEEE Recommended Practice for Maintenance, Testing and Replacement of Valve-Regulated Lead-Acid (VRLA) Batteries for Stationary Applications), whilst a more accurate preventive maintenance program can be carried out using a BMS (Battery Monitoring System) which provides all the parameters of the individual battery blocks, continuously checks the battery's efficiency and identifies anomalies in advance.

### What is a battery ?

A battery is made up of a collection of:

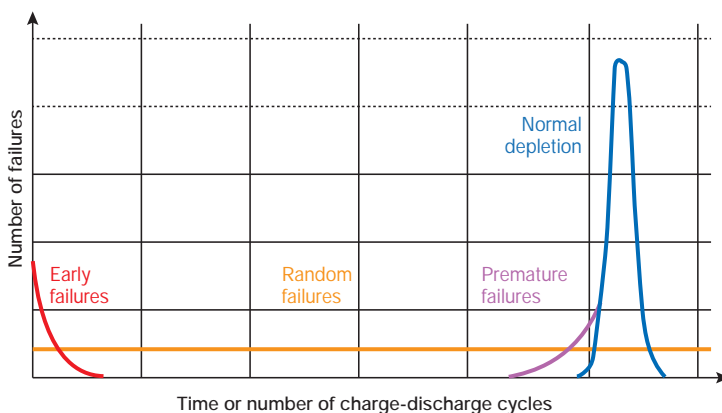

- > blocks (typically 12 VDC), which can be assembled in series to form a string,
- > several identical strings, which can be assembled in parallel to form a battery.

## Main reasons for battery block failures

For a battery operating in real life conditions, there are 4 types of failures which can create a defective block:

1. Early failures, which are mainly due to defects introduced during the manufacturing process. They generally appear during the first discharge cycle.
2. Random failures, which can appear at any time during the life of the battery.
3. Premature failures.
4. End-of-life failures, both of which are due to latent defects or environmental conditions, such as a high ambient temperature, which can shorten the battery's operational life time. If this type of failure appears, it means that the health of the battery string is seriously compromised and the battery cannot be relied upon for autonomy.

Block failures description.

WP 034 A GB

# Customer training

certified manufacturer's training programme for UPS and STS

Socomec specialists can help you gain the necessary skills to operate your equipment efficiently and to increase its availability.

Socomec technical training courses can take place either at your site or in Socomec's dedicated training centre.

Available on MASTERYS, MODULYS, DELPHYS, STATYS and communication products.

## Key points

- > Practical training
- > Either in Socomec factories or at customer's site
- > Open discussions and participants' feedback
- > Many types of configurations covered
- > Real-case simulations based on customer's actual installation
- > Experienced 'field-tested' trainers

## Benefits

- > Helps you to really know your equipment
- > Real "hands-on" practice on your UPS
- > Understand the alarms

## inspection visit for ATyS Automatic Transfer Switch

APPL/299/EPS

A routine inspection of the transfer switches by qualified personnel is required to meet the requirements of insurance companies and to ensure the optimal operation of critical applications.

The inspection visit for ATyS comprises a site visit by a qualified Socomec engineer, which certifies that each transfer switch is functioning correctly.

After each inspection and testing procedure the engineer will provide a detailed report and declaration of conformity.

### Key points

- > Manufacturer seal of approval
- > Latest firmware updates
- > Complete report including technical recommendations
- > Declaration of conformity

### Benefits

- > Guaranteed high power availability and optimum performance
- > Reduced risk of potential faults going undetected
- > Avoids costly downtime and operating losses

ERGY STORAGE

# Preventive maintenance

for energy storage systems SUNSYS HES L and SUNSYS HES XXL

Preventive maintenance is vital in order to ensure that your energy storage system is operating at peak efficiency. If you subscribe to an extended warranty for your system a preventive maintenance contract is mandatory.

#### Adapted to your budget

- We offer several options that may or may not be selected when subscribing to the service.

*See options detailed on the next page.*

#### Optimisation tips

- When our experts share the preventive maintenance report with you, they also provide advice in order to help you improve the use of your system and its operating environment.

#### Autonomy « à la carte »

- Depending on your desire and your skills, we can empower you by providing training in specific maintenance operations so that you can carry out some activities yourself.

#### Peace of mind

- If you want a turnkey solution, our experts take care of everything! They take care of preventive maintenance from its planning to its completion in order to guarantee the reliability of your system, to maximise its lifespan and to limit corrective operations.

#### A solution for

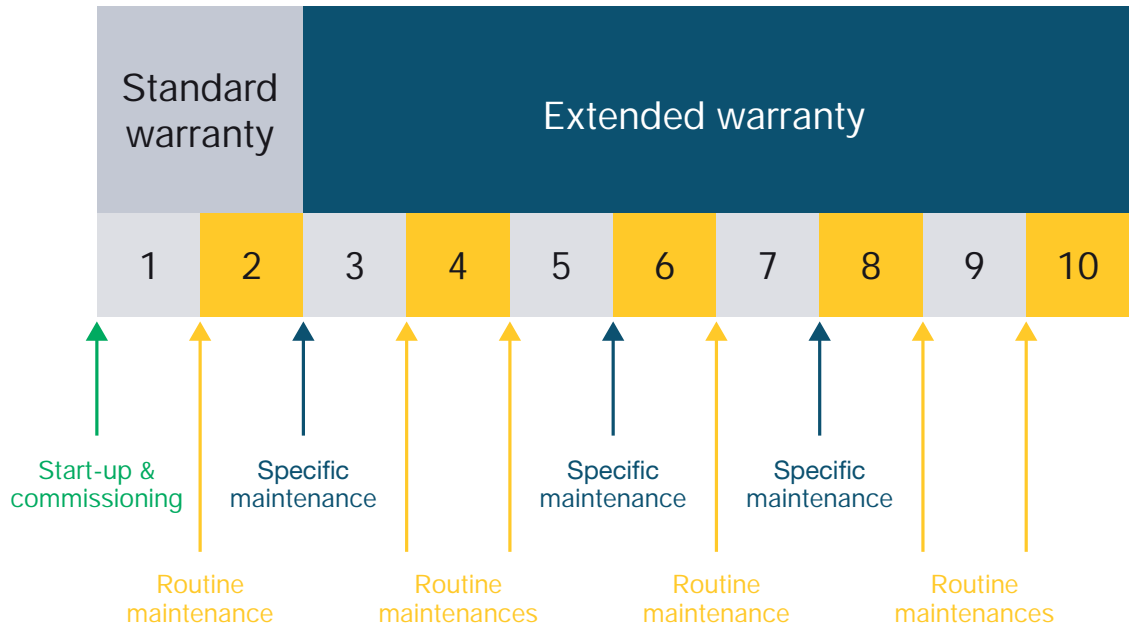

- > Commercial and industrial buildings
- > Electric vehicle charging stations
- > Isolated microgrids
- > Resilient microgrids

#### Key points

- > Several options available to adapt the offer to your budget
- > Personalised support from our experts according to the desired level of autonomy
- > Tips to improve your performance

# Preventive maintenance

for energy storage systems SUNSYS HES L and SUNSYS HES XXL

SUNSY\_360\_A\_EN/1

## Preventive maintenance - optimising the lifespan of your system!

To guarantee optimal system operation, periodic maintenance by an expert is essential. This is the best way to ensure the reliability of your system over its lifetime.

2 modular offers are available:

- DIY partner package: an offer favouring cost reduction but also requiring input from you.
- Complete Socomec package: a complete offer for your peace of mind, where we take care of everything.

	DIY PARTNER PACKAGE	COMPLETE SOCOMEC PACKAGE
Routine maintenance visits carried out by Socomec		Included
Specific maintenance visits carried out by Socomec	Included	Included
Preventive maintenance visit report with recommendations	During specific maintenance visits	Included
Labour included	During specific maintenance visits	Included
Parts for specific and routine maintenance operations	Option	Option
Training in routine maintenance operations	Included	
Software update	During specific maintenance visits	Included

# Extended warranty

for energy storage systems SUNSYS HES L and SUNSYS HES XXL

APPL/0071EPS

Warranty extensions are available to provide a total warranty of 5 to 10 years for your battery or the complete storage system, depending on your needs. It includes the corrective maintenance of your guaranteed items (parts included) as well as a follow-up of your requirements.

#### Full coverage

- Benefit from an extended manufacturer's warranty of up to 10 years, depending on your needs.

#### Controlled budget

- You know the price of the warranty extension from the outset and, with just one payment, you can therefore avoid unforeseen costs.

#### Battery performance guarantee

- The warranty extension includes a performance warranty on the battery. This is the warranty of a DC residual energy level depending on the battery use.

#### Speed of intervention

- In the event of a breakdown, our experts provide you with a rapid response: within 1 day for initial telephone support and within 1 week for an on-site visit, if this is required.

#### A solution for

- > Commercial and industrial buildings
- > Electric vehicle charging stations
- > Isolated microgrids
- > Resilient microgrids

#### Key points

- > Complete coverage of your system
- > Controlled budget
- > Battery performance guarantee
- > Peace of mind

# Extended warranty

for energy storage systems SUNSYS HES L and SUNSYS HES XXL

## What does the extended warranty cover?

- Corrective maintenance of the complete system or just of the battery, depending on the chosen warranty, (repair or replacement of defective parts), including parts replaced, the labour on site as well as travel and accommodation costs<sup>(1)</sup>
- Battery performance guarantee
- Assistance from our team of experts in the event of a problem, with a response as soon as possible

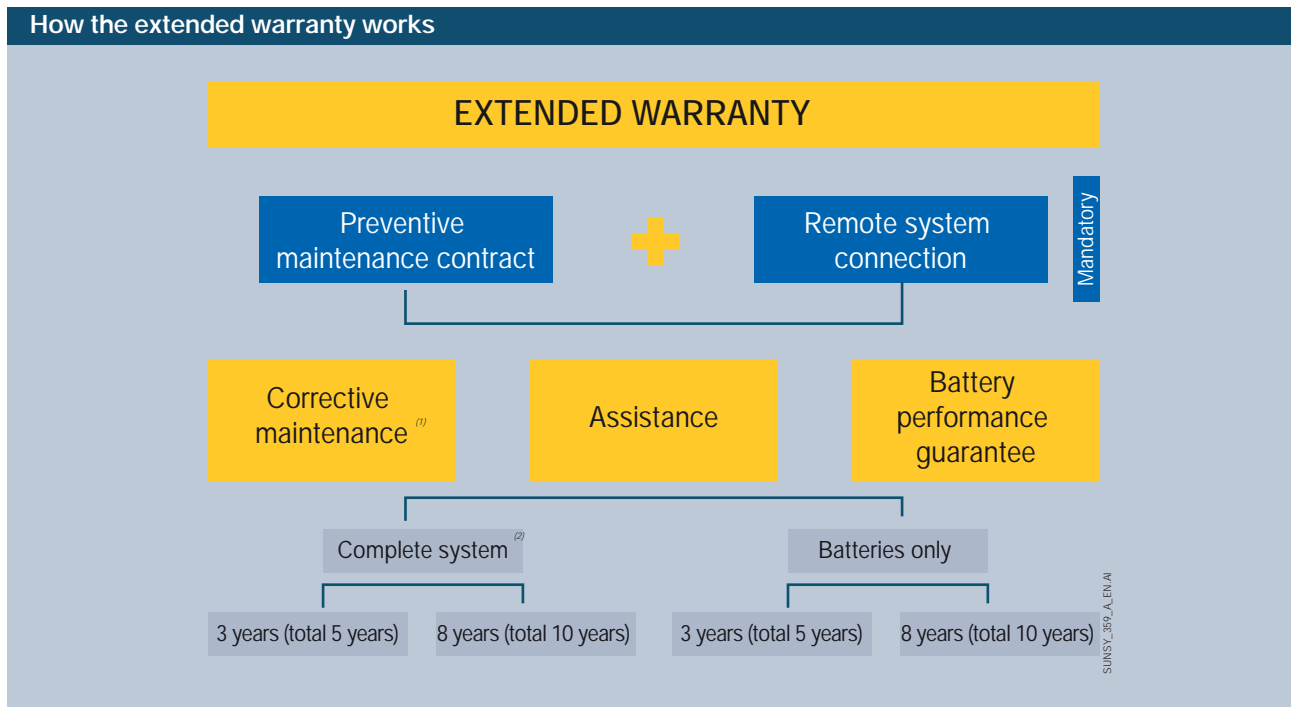

## What conditions must be met in order to benefit from this cover?

For the warranty to be valid, a preventive maintenance contract must be drawn up. It is also mandatory to have a remote system connection allowing access to historical battery data.

## A guarantee that's adapted to your needs

In order to offer you greater flexibility with your guarantees, we offer various options:

- 3-year warranty extension (total system warranty period 5 years)
- 8-year warranty extension (total system warranty period 10 years)
- Extended warranty applicable to the complete system
- Extended warranty applicable to the batteries only

<sup>(1)</sup> Provided that the installation is in a country where a Socomec subsidiary is present and as specified in your commercial offer.

# Professional services

## Project consultancy

Personalised support for unique projects ..... *p. 66*

## Audit

Improve your site's power factor ..... *p. 67*

Power Quality Audit for optimising the reliability,  
efficiency and safety of your equipment ..... *p. 68*

## Power testing & certification

Tesla Lab ..... *p. 69*

# Project consultancy

personalised support for unique projects

Our team of experts is here to help you meet the requirements of each project and to make the best choices.

We will perform a diagnostics of your facility, give you personalised technical advice and help budget your finances.

Whether it's replacing a UPS, sizing a power factor correction system (PFC), implementing a monitoring architecture as part of an ISO 50001 project... our experts are on hand to support you at every stage of your project:

- Identifying the project: brief, design, support.
- Preparing for the project: onsite surveys, sizing, implementation planning, financing.
- Implementing the project: commissioning, facility optimisation, operating services.
- Evaluating the project: end-line report with areas for improvement.

## Key points

Tailor-made:

- > Project identification
- > Project preparation
- > Project evaluation
- > Project implementation

# Audit

to improve your site's power factor

APPL 10/6/EPS

Reactive power has negative effects on electrical networks. A number of factors must be taken into account to effectively compensate for it.

Our expertise:

- Audit: we identify loads and analyse their effects on the network
- Sizing: precise calculation of the reactive power to be corrected
- Installation recommendations: choice and location of equipment

#### References

Measuring – Analysis – Sizing the power factor correction system	923 403 6000
Options	
COSYS inspection visit	923 402 6000
COSYS commissioning	923 101 6000
COSYS SILVER service maintenance contract	923 302 6000
COSYS SILVER service maintenance contract for Multibrand	923 302 6100
COSYS PLATINUM service maintenance contract	923 304 6000

#### Key points

- > Taking the customer's environment into account
- > Logging a week's worth of customer data
- > Correctly sizing the compensation system for your installation, if necessary

#### Benefits

- > Assessing the available power
- > Recommended means of compensation
- > Optimising the efficiency of transformer units

# Audit

Power Quality Audit for optimising the reliability, efficiency and safety of your equipment

APPL/201/PS

The Power Quality Audit (PQA), is a service offered by Socomec that checks the load level and the quality of the low voltage electrical installation.

The PQA uses network analysers, designed to detect faults and deteriorations and record parameters and information over a significant period that may be of use in locating the causes of electrical disturbance.

Data is collected and analyzed by Socomec engineers who diagnose the problems. They then suggest the most appropriate solutions that will have beneficial impact on the reliability of the installation, and ultimately extend equipment lifetime.

#### References

Measurements - On-site data logging - Investigation	923 404 2500
Energy quality	consult us
Harmonics and Power Factor correction	consult us
Neutral earthing system	consult us

#### Key points

- > Voltage variation
- > Harmonic distortion
- > Transient current
- > Neutral and earth fault, EMC environment
- > Unbalanced three-phase load
- > Power factor correction

#### Benefits

- > Detects recurring faults
- > Identifies phase shifts and malfunctions
- > Anticipates deterioration of the installation
- > Extends service life of equipment
- > Improves system reliability

# Power testing & certification

Tesla Lab

CORPO\_351\_LB\_EPS

Tesla Lab - Power Testing and Certification is an independent laboratory specialized in testing of LV switchgears, components and switchgear assemblies.

Thanks to a wide range of equipment and experience in electrical, mechanical, climatic and functional tests for low voltage operating, control, safety and measuring equipment, Tesla Lab can relieve you of all the administrative steps involved in a large number of certification procedures.

It will take care of the contacts with the certification bodies as well as monitoring the procedure through to the obtaining of the certificate.

Tesla Lab is accredited by

and regularly works in partnership with the international certification bodies: KEMA, CEPEC, UL, CSA, ASTA, Lloyd's Register of Shipping, Bureau Veritas, BBJ-SEP, EZU, GOST-R, ...

## Key points

- > Several categories of tests: short-circuit tests, verification of temperature rise, overload of endurance tests
- > Several standards covered: IEC, EN, UL, CSA

## Benefits

- > No need to have multiple contacts to test your products for compliance in multiple markets
